

CHARTING NOTICE

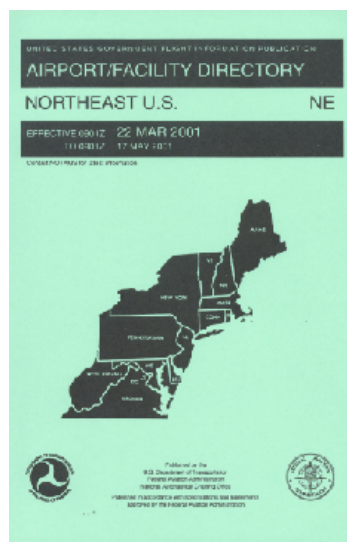

Airport/Facility Directory (A/FD)

Beginning July 12, 2001

Airport Diagrams for selected Part 139 airports will be added as a separate section to the Airport/Facility Directory beginning July 12, 2001, in support of the Federal Aviation Administration's "Runway Incursion Program". Diagrams will be listed in order by associated city and airport name. Airport diagrams (5"x8") will depict current runway and taxiway configurations and will assist both VFR and IFR pilots in ground taxi operations at large complex metropolitan airports.

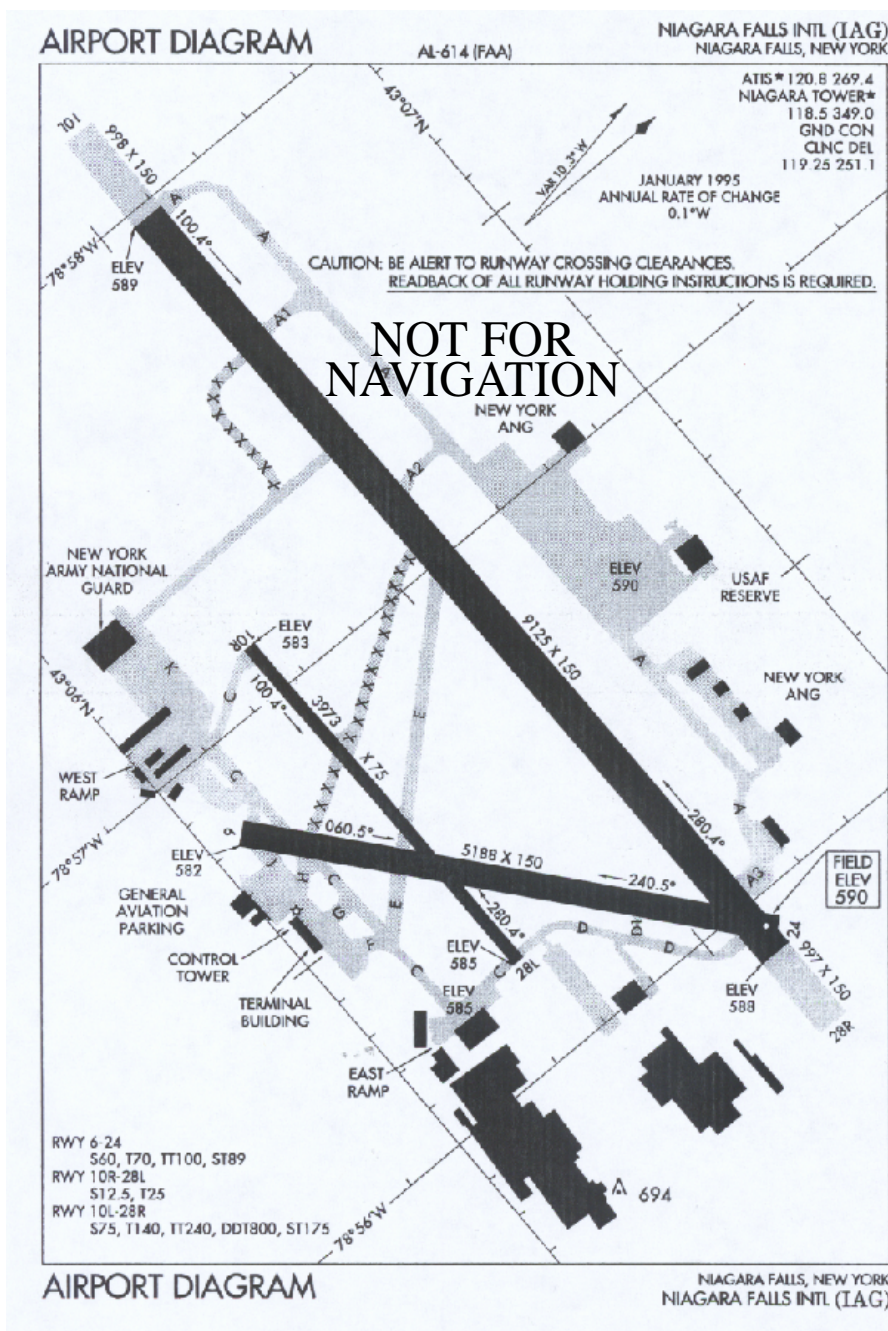

The airport diagrams that are added to the A/FD will be the same full page charts that are published in the IFR Terminal Procedures Publications, and will be in addition to the VFR sketches that are already being added to the A/FD.

Airport diagrams are also available on the National Aeronautical Charting Office Web page at <http://acc.nos.noaa.gov>.
